Technology watch and industry trends

PROFESSIONAL PROFILE

Web Development Engineer and **Microsoft Dynamics 365 Business Central Consultant** with solid experience in ERP and web development environments. Analytical and results-driven, recognized for adaptability, rigor and the ability to design and deliver technical solutions that fit business needs. Passionate about innovative technologies and continuous process improvement.

PROFESSIONAL EXPERIENCE

Consultant – Dynamics 365 Business Central

2023 – Present

Smart Business Solution

Business Central & NAV Development (AL / C/AL)

- Designed, developed and customized ERP solutions on **Dynamics 365 Business Central** and **Dynamics NAV**, tailored to each client's business processes and specific needs.
- Developed in **AL and C/AL**: created and extended tables, pages, reports, procedures and business features, and customized standard Business Central processes.
- Analyzed functional and technical requirements, designed custom solutions and supported users as their ERP environments evolved.
- Customized **purchasing and sales** processes: item management, pricing, free-quantity rules, request lines and business workflows.
- Designed advanced **item classification and mapping** features enabling multi-level category organization and simplified navigation of item data.
- Built dedicated **fleet and automotive transport management** features covering operational tracking, reporting, vehicle data management and process optimization.

Integrations, E-Invoicing & E-Reporting

- Integrated Business Central with external systems through **REST / OData APIs**, implementing data exchange, transformation and synchronization mechanisms.
- Integrated external APIs to retrieve and update **automotive manufacturer data**, with processing and mapping to load it into ERP master data.
- Developed **e-invoicing and e-reporting** solutions in Business Central: accounting document integration, structured **XML file generation** and interfacing with external platforms.

Migration & Multi-Company Environments

- Migrated production environments from **Navision to Business Central**, adapting existing code, carrying over custom functionality and validating data integrity.
- Managed **multi-company and multi-environment** scenarios, ensuring consistent business logic and developments across configurations.

PROFESSIONAL EXPERIENCE (CONTINUED)

ERP-Web Solutions & Deployment

- Developed ERP-Web interfaces and complementary web solutions exposing Business Central data through modern, interactive front ends.
- Built web applications with **ReactJS, Node.js and MongoDB**, including user interfaces, backend APIs and features to view and manage ERP data.
- Created dashboards, forms and interactive interfaces to improve data accessibility, user experience and decision-making.
- Set up and maintained deployment environments on **Windows Server**, including web application hosting and Node.js process management with **PM2**.

Support, Training & Maintenance

- Advised and trained users on Business Central / NAV best practices, business processes and the custom solutions delivered.
- Provided evolutive and corrective maintenance: incident analysis, performance optimization and continuous improvement of ERP and web features.

KEY PROJECTS

Engineering Final Project – Business Central Web Platform

Designed and developed a web platform connected to **Microsoft Dynamics 365 Business Central** to automate and optimize purchasing and sales processes. Implemented a full-stack architecture with **ReactJS, Node.js and MongoDB**, integrated ERP data through **OData / REST APIs**, and built features for real-time data management, synchronization and consultation.

Higher Technician Final Project – Mixed Reality Application

Developed an AR/VR mixed-reality application supporting children with autism spectrum disorder through immersive environments and adapted interactions.

Web Applications

Designed and developed a variety of web applications, including e-learning platforms, professional portfolios and interactive web apps.

INTERNSHIPS

- **Smart Business Solution** – Engineering internship and final-year project
- **DiGiArt Living Lab** – Technician internship and final-year project
- **STB Bank** – Introduction to professional life internship
